Internship Experience

Software Developer Intern (KKP) | SDIT Hidayatullah

August 2024 - January 2025 | Cipayung, Jakarta Timur

- Develop a Java - based library administration application (desktop) to support the management of book data and other data.
- Work together in a team consisting of 7 people in the application system design and development process. Help design features such as managing book data, member data, librarian data, book loan data, book return data and book fine data.
- Coding, debugging and testing the application so that it runs well.

Education

Universitas Indraprasta PGRI (UNINDRA)

B.Sc in Informatics Engineering (2021 – September 2025) | GPA: 3.53/4.00

Academic Projects

Sistem Pendukung Keputusan

- Building an SPK application for selecting the best game cassettes using the Java - based Analytical Hierarchy Process method.
- Implement AHP calculations to produce objective decisions.
- Developed tape data CRUD features, criteria, and subcriteria.
- Produce output in the form of alternative rankings and decision reports.

Histocial Figure

- Developed a website that introduces historical figures and their contributions to world history.
- Created pages displaying biographies, achievements, and important historical information.
- Implemented navigation features to help users browse historical content efficiently.
- Organized historical data into structured categories for easier access and understanding
- Developed the website using HTML, CSS, and JavaScript.
